

Company Building Knowledge Canada Inc.

Job Title Residential Energy Evaluator

Department Residential Energy Modeling

JOB SUMMARY

Building Knowledge Canada is a progressive, building science and building energy performance firm based in Cambridge Ontario. BKC provides support to new home builders across Ontario through building code energy modeling, blower door testing and volunteer program compliance evaluations (Energy Star for New Homes, LEED for Homes, Net Zero Home, R2000, etc).

This position is within a fast paced, highly productive office (and occasionally construction site) environment.

Preference will be given to candidates who:

- Have experience and necessary skills working with residential construction plans, completing volume/surface area take-offs and measurements OR have previous experience working with the Natural Resources Canada HOT2000 energy modeling software
- Have substantial experience in the residential building sector OR have completed a degree/diploma as a CET or ACET
- Have experience as a qualified energy advisor or experience with residential energy modeling. The position may involve becoming a certified Energy Evaluator-and support through BKC for this accreditation would be provided.

A working week consists of 37.5hrs, Monday to Friday.

More specific job details to be discussed at interview.

HELPFUL RELATED EXPERIENCE

- Working knowledge of computer software programs such as:
 - AutoCad, Revit, Hot2000, Microsoft Excel
- Experienced in areas such as:
 - Heat loss heat gain and duct design

Please send all resumes to info@buildingknowledge.ca

Responses will ONLY be sent to preferred candidates.

Submission Deadline is Feb 16th. All resumes/cover letters will be reviewed on February 28th.
